Q: Using the "r" value in a series of equations  
The value "r" in the following equation is the radius of a circle. The equation I know is:

$r = \sqrt{x^2 + y^2}$  I'm unsure as to what I need to do to make sure "r" is equal to "3",

specifically the 3 in the parenthesis. A: If

$r = \sqrt{x^2 + y^2}$ , then  $3 = r$  implies

$\sqrt{x^2 + y^2} = 3$  implies

$\sqrt{x^2 + y^2} = 3 \sqrt{1}$  implies

$x^2 + y^2 = 9$  Therefore,  $x = 3$  and  $y = 3$ , or

$x = \pm 3$  and  $y = \pm 3$ . If  $x = 3$  and  $y = 3$ ,

then you have a circle with radius  $r = 3$

centered at  $(0,0)$ . If  $x = -3$  and  $y = -3$ , then

the circle is centered at  $(3,0)$ . Nanoemulsions

are stable dispersions of oil or water with a size

less than 100 nm. Generally, a nanoemulsion is

formed through a solvent induced phase

separation process. The oil and water are mixed

with each other, and an emulsifier is added to

the resulting emulsion. The emulsifier may be a

water soluble emulsifier such as a

---

polyethoxylated or polysorbate surfactant; or a water soluble polymer including polyvinyl alcohol, a polyacrylate and/or a polyvinyl acetate. Nanoemulsions are often very stable and a nanoemulsion is thermodynamically not a supersaturated system. However, nanoemulsions are typically metastable. A common method to destabilize a nanoemulsion is the addition of salt, which is a good destabilizer for a nanoemulsion.

Despite the difficulties his team faced in getting a spot in the 2014 UEFA Champions League group stage, Jurgen Klinsmann is confident that the U.S. can qualify for the 2014 FIFA World Cup.

---

"I really can't see another team that can win that group with a line-up of players that they have," Klinsmann said. "I mean, there's so many very good teams and very good players in the World Cup, it's so unbelievable. To be on the verge of qualifying is just really great. I'm really proud of the team. Really proud of the team, I love the team." After qualifying for the 2014 World Cup back in November, Klinsmann's men were forced to settle for second place in the final CONCACAF hexagonal. Despite the progress, the U.S. still has a ways to go to qualify for the World Cup, as only five of the seven matches in the preliminary stage of the tournament have been won. For Klinsmann, the U.S.'s failure to make the World Cup field may be a sign that his side needs to make significant alterations to their tactics. Instead of relying on their talented attackers, he'd like to see a more disciplined, hard-working squad that is suited for the extra time of international competition. "To me, we're the type of team that needs to play 90 minutes and I think we are to some degree," Klinsmann said. "That's the type of team we've been when we've been

winning. The amount of time that we have to spend in the World Cup is the amount of time it takes for us to turn around. What we play in the World Cup, in the big games, we're just not ready. And, we need to get ready. "I think we need to be more disciplined. I'm not talking about our players. Our players are disciplined, they train for months, they're great all-around players that are out there. Our entire team is great, but we need to be more disciplined, more focused, we need to be more ready to play and do what we know we need to do to win on that extra time, on that extra day, on that extra week. That's what I would want out of my team if I was in charge of the national team." His suggestion of a more disciplined team is at odds with other U.S. coaches. As head coach of the German
